

Kamado Kradles

Largo 1084

The Perfect Way to Showcase Your Culinary Skills!

IBD Outdoor Rooms introduces a complete line of Kamado Kradles designed to properly protect your kamado and make it even more versatile. We all love our kamados, but let's face it, the metal stands or wooden tables offered by most companies leave much to be desired.

IBD's Largo Kamado Kradle uses our benchmark construction standards to produce a cooking center built to last a lifetime. Model 1078 is designed to fit large kamados of any brand, and the 1084 fits oval kamados or provides more space around a large.

IBD offers the kradles ready to finish with your choice of stone, brick, tile or stucco. You may also choose to have your unit factory finished with our unique, low maintenance *Granitech* finish, that begins with a base of pure granite granules.

Your choice of doors, drawers, cooler pullouts or storage bins combine with the generous counter area for the ultimate in style and convenience.

Pictured with optional IBD granitech finish and locally supplied granite counter top. Kamado and accessories not included.
